

Delock Converter mSATA male > 2 x SATA 7 pin male with RAID

Description

This converter by Delock expands the system by two SATA ports. When using more than one SATA port, there is the possibility to use different RAID modes. Through the predetermined breaking point, the length can be shortened from full size to half size.

Note

This product provides a chipset-based RAID function. Management and setting of the RAID mode is not possible via the operating system or BIOS. Different diagnostic software is not compatible with this solution.

The SMART function is not supported. JBOD is only supported on SATA controllers with port multiplier function.
