Delock Active Optical Cable USB 10 Gbps Type-A male to Type Micro-B male with screws 7.5 m

Description

This USB cable by Delock allows you to connect devices with a Micro USB 10 Gbps connector to a PC or laptop with a free USB port. The screws of the Micro USB connector secure the connection and prevent accidental unplugging of the cable.

Active Optical Cable
This active optical cable uses optical fiber to transmit high-speed signals. Compared to traditional copper cable, it is softer, thinner, lighter, and can transmit signals over longer distances without loss.

Durable NBR cable jacket
The material of the cable jacket makes the cable flexible and durable, making it suitable for use in drag chains and harsh environments.

USB with 10 Gbps
The active optical cable enables data transfer rates of up to 10 Gbps when connecting USB 10 Gbps compatible devices. Of course, USB 2.0 devices can also be connected.
