

# Delock Industrial Barcode Scanner 1D and 2D for 2.4 GHz, Bluetooth or USB

#### Description

This barcode scanner by Delock can be wirelessly connected to a PC, laptop or directly to a mobile phone or tablet. All common**1D and 2D** barcode types can be precisely captured even at long distances. Additionally, the scanner recognizes barcodes displayed on displays and monitors.

#### Automatic adaptation to ambient brightness

The scanner automatically adapts to the ambient brightness and captures **up to 120 scans** per second under optimal lighting conditions.

In low ambient brightness, the barcode is illuminated by an **additional white LED** and can therefore also be used in poor lighting conditions.

#### Sturdy processing

Due to its sturdy design, the scanner can easily absorb**falls of up to 1.80 m** and is therefore ideally suited for use in industrial environments.

#### Transmission via Bluetooth, USB or 2.4 GHz

The data transfer of the scanned barcodes is done either via **Bluetooth** directly with the Bluetooth capable output device or via the **2.4 GHz frequency** band using the included **USB dongle**. Alternatively, the scanner can be connected to the computer with the included **USB cable**.
